DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitchell in view of Huzyak, both newly cited. Note the partitioning roller 30 of Mitchell that functions in a manner as claimed. Huzyak discloses that his shape sensing roll 18 measures transverse deviations in strip tension, see col. 3, lines 43-53. Thus it would have been obvious to one of ordinary skill in the art to use a tension measuring roll in the device of Mitchell as the shape sensing device 24 in view of the teaching of Huzyak, because both Mitchell and Huzyak sense the shape of the strip and Huzyak discloses that the shape sensing device could take the form of a tension measuring roll.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Griffin discloses another shape sensing roll in a coil winding device.
